India currently has one of the most dynamic economies in the world. Rapid growth, increasing wealth, domestic and foreign investment and a huge talent pool have been created by a series of ambitious reforms initiated in 1991. Many Indian corporates are now investing globally and the number that do will continue to grow.

Eversheds has long recognised India as a key player in the global economy. We have been working in and around the Indian market for over 20 years and have a strong network of best friend law firms and other advisers in the country. Using this experience and expertise we have created an event you can trust to give you the information you need on India and doing business there.

As well as listening to our expert speakers, you will be able to meet with other high level guests who share your business interests. Issues can be discussed in a relaxed atmosphere where you will also be able to enjoy some special Indian cuisine.
